

I Love Nature
By Joe Reilly

I love nature nature is cool
The forest is my classroom the earth is my school
Trees are my teachers animals are my friends
And on this school all life depends

I love all of nature yes its true
That means I love myself and I love you too
When I look around me nature is all that I'm seeing
The plants animals earth sky and human beings
The forest is like one big community
Many animals might live inside just one tree
And that tree gives us oxygen so we can breathe
That whole interaction is called ecology

I love nature nature is cool
The forest is my classroom the earth is my school
Trees are my teachers animals are my friends
And on this school all life depends

I love flowers they are so pretty
I love them in the forest and I love them in the city
And I love mushrooms too in pizza or in salad
But my favorite place for mushrooms is right here in this love ballad
I love children and H2O
And children who love nature can help the rivers flow
By protecting habitat like wetlands and wet meadows
When we work together we can help nature grow

I love nature nature is cool
The forest is my classroom the earth is my school
Trees are my teachers animals are my friends
And on this school all life depends

So lets love nature right now with all our hearts
Yes this present moment is a great place to start
We don't need any money it might take a little time
We need to open up our arms hearts mouths and minds
To see all of the gifts mother nature can bring
And learn to appreciate it it makes us want to sing
And when we are smiling and singing our song
Other people hear and they want to sing along

I love nature nature is cool
The forest is my classroom the earth is my school
Trees are my teachers animals are my friends
And on this school all life depends
